DOCTOR MARKETING REFERRAL SUPPORT UPDATES..... 4

Order Entry Web Service Changes..... 4

PATIENT AND SALES ORDER MARKETING REFERRAL SUPPORT..... 4

PATIENT SERVICE UPDATES..... 5

Inventory Web Service Updates 5

INTRODUCTION

This document provides a summary of the updates and enhancements made to the Brightree Web Services API as part of Brightree Release Spring 2013. For more detailed information regarding the web service requests and responses, refer to the web service-specific Reference Guides and the *Brightree API Message Definitions Reference Guide V0100 – 1302*.

Brightree conducts backward compatibility testing with each new release of the Brightree Web Services API. This helps to reduce the effort you previously invested in regression testing each time a new Brightree release occurred. Brightree recommends that you review your current system upgrade plans to determine if you will continue to perform regression testing in either the test environment or your sandbox environment. This will verify that your previously implemented integration performs as it did prior to your scheduled Brightree system upgrade.

In order to take advantage of the additional capabilities of the Brightree Web Services API V0100-1302, you will need to update your integration to use the latest version and to perform the development effort needed to incorporate these desired capabilities into your implementation. You may also need to obtain access to the specific Brightree Web Service.

For more information about implementing a new system integration using a web service you do not currently have access to, contact Brightree Sales at 1.888.598.7797 Extension 5 or email info@brightree.com.

COMMON WEB SERVICE CHANGES

Common Web Service changes provides an overview of the enhancements and updates included in Common Web Service. More detailed information can be found in the *Brightree Common Web Services API Reference Guide V0100-1302* and the *Brightree API Message Definitions Reference Guide V0100-1302*. The difference in operations, service contracts, and message definitions are marked with a bar (|) in the margin of these Reference Guides.

REFERRAL OPTIONS EXPANDED

Referral options were expanded for the Doctor, Marketing, and Facility web services. These referrals now include the ability to create or add referrals, search and update referrals, remove or delete referrals, and to track existing referral contacts in the Brightree system.

ADDED CONTACT TYPES API SUPPORT

Reference web service request/response was expanded to provide the ability to create, update, search, delete, and fetch existing contact types in the Brightree system.

DOCTOR MARKETING REFERRAL SUPPORT UPDATES

Updated doctor contacts to doctor referral contacts.

ORDER ENTRY WEB SERVICE CHANGES

Order Entry Web Service changes provides an overview of the Patient and Sales Order Marketing Referral Support and Patient Service updates. More detailed information on these changes can be found in the *Brightree Order Entry Web Services API Reference Guide V0100-1302*, the *Brightree Patient Web Services API Reference Guide V0100-1302*, and the *Brightree API Message Definitions Guide V0100 – 1302*. The difference in operations, service contracts, and message definitions in the Reference Guides are marked with a bar (|) in the margins of the guides.

PATIENT AND SALES ORDER MARKETING REFERRAL SUPPORT

Patient and Sales Order web service referrals now include the ability to add and remove new marketing referrals and remove referrals in the Brightree system.

PATIENT SERVICE UPDATES

Added an audit information section to the patient record. Also, added the patient condition in the API so that it will appear under the Clinical tab of the patient record.

INVENTORY WEB SERVICE UPDATES

Inventory Web Service updates includes a fix to the inventory web service calls to return correct information in the event of missing or incomplete data.
